Vu Timing Ramp Set

This exciting addition to the Vu data logger gives a low cost solution allowing students to study time and speed experiments.

The ramp comes with height adjustment support, cart, magnet, and timing switches.

The Vu LCD screen and the PC screen can show both time and speed results.

** Vu sold separately **

\$149

Vu Power House

With this power house, you can explore alternative energy and sustainable living.

Build the house, connect the solar panels to the Vu logger using the included Voltage sensor. How much electricity is generated?

Use the Vu temperature sensor to measure the heat gain and loss of the house. You can even grow plants in the green house!

** Vu sold separately **
